SKILLS & TOOLS

Visual design | Figma | Claude Code | User research | A/B testing | Prototyping & usability testing | Design systems | iOS, Android & web | Cross-functional collaboration | 0-to-1 end-to-end product design | HTML/CSS

EXPERIENCE

Amazon Delivery Experience

Senior Product Designer

March 2026 · present

- Own post-purchase controls for 200M+ Prime members on Your Orders, Amazon's #2 most visited page
- Define extensible patterns and primitives for away teams, aligned with research, content strategy and legal
- Ship every design as a controlled experiment, measured on revenue up, contacts and concessions down
- Find upstream fixes for the doorstep handoff moment, so deliveries fit into customers' lives, not our operations
- Prototype in code and synthesize large data sets with AI; write reusable skills, share new learnings with team

Amazon Last Mile

Senior UX Designer

March 2024 · March 2026

- Led end-to-end driver UX for Amazon Now across 5 product areas, set strategic direction for global expansion
- Redesigned onboarding, work offers and earnings so drivers could trust a new, variable pay model
- Designed anti-fraud flows for India and the Middle East: cash on delivery, OTP verification, product exchanges
- Planned and ran ride-alongs and station visits with ops staff; shaped launches with go-to-market and comms
- Built an AI-assisted localization playbook so designers could test translated copy before implementation

Amazon Web Services

UX Designer I-II

June 2021 · March 2024

- Designed and prototyped a 0-to-1 scheduling and task app for frontline retail and warehouse teams
- Validated it in usability tests (75 SUS score); demoed it to prospective customers at NRF trade show in 2023
- Owned Chime profile features with no PM, adding pronunciation, pronouns and local time to meetings and chat
- Took Chime mobile through WCAG 2.1 AA certification, triaging every defect alongside platform engineers
- Advanced Chime's design system, migrated it to Figma, and shipped dark mode (requested by 1000+ users)

General Assembly

Designer in Residence

August 2020 · April 2021

- Partnered with lead instructors to deliver full-time UX curriculum for new tech professionals
- Tutored cohorts of 20–30 students in a structured, inclusive remote environment
- Planned and drove virtual workshops, speaker panels, and pro bono client screening

PROJECTS

slow•tech studio

Co-founder

2022 · present

A small design studio practicing “slow tech,” the idea that digital products should earn attention, not extract it. We explain the invisible incentive systems behind everyday apps through video content and a monthly newsletter, turn provocations into public experiments, and give fellow builders frameworks for ethical UX.

Attention Attention

Educational board game

2026

- Co-designed a board game that teaches the behavioral economics of the attention economy
- Shaped it through guerrilla research with parents, educators, Gen Z and fellow technologists
- Playtested at DePaul's RAISE Lab, and spoke with HCI MA students about building a resilient UX career

Small Talk

Community research pop-up

2023 · 2024

- Built an open-air research installation on AI and the loneliness epidemic at annual Seattle Design Festival
- Invited passersby to practice making small talk with emerging Gen AI chatbots, then reflect on how it felt
- Adapted the experiment into a workshop on AI and loneliness for Design Matters conference in Tokyo

EDUCATION + CERTIFICATES

Massachusetts College of Art and Design · BFA in Photography, Academic Honors

School of Visual Concepts · UX Design & Research Apprenticeship

Nielsen Norman Group · UX Certificate, Interaction Design specialty

General Assembly · User Experience Design Immersive
